PROFESSIONAL SUMMARY

Data-driven AI/ML professional and project manager with cross-functional experience in LLM evaluation, generative AI, data annotation, information integrity, and data analytics & visualization. Proven track record in project management, stakeholder engagement, quality assurance, and technical documentation across AI training, research and development, and backend engineering. Skilled in Python, SQL, REST APIs, computer vision, NLP, and agentic AI, with a strong record of leading teams, delivering client-facing solutions, and driving measurable process improvements.

WORK EXPERIENCE

Information Integrity Specialist — UNDP Nepal

March 2026 – May 2026

- Monitored digital content across multiple channels (video, infographics, social posts) per week, identifying and reporting 20+ confirmed instances of misinformation to Nepal's digital integrity response team.
- Produced multiple multimedia intelligence reports and infographics tracking online narrative trends, delivered to internal stakeholders.
- Partnered with the Election Commission of Nepal to collect and analyze post-election data from all internal sources, delivering final analysis reports and data visualization dashboards used in the post-election summit.

Master Engineering Specialist – AI Trainer — Invisible Technologies

December 2025 – Present

- Evaluate and refine AI-generated websites and multimedia content across 2 projects per week, improving output quality against defined benchmark criteria.
- Develop creative content quality frameworks spanning text, image, and video formats, adopted by a team of 10,000+ trainers to standardize evaluation.

AI Data Specialist — RWS

October 2025 – Present

- Assess and rank outputs from 100+ LLM models per week, selecting top-performing responses against defined quality criteria (RLHF/model evaluation).
- Review and select optimal media assets in side-by-side comparisons per week, maintaining 95% consistency with QA standards.
- Generate, iterate, and finalize 30+ AI-produced websites per week for client delivery.
- Annotate 1,000+ media items (image, video, audio) per week at 90% labeling accuracy.
- Flag, tag, label, count, and translate 1,000+ data records per week, maintaining a 90% QA pass rate.

Project Lead — PANA Academy Pvt. Ltd.

May 2025 – January 2026

- Delivered AI/ML and Agentic AI training to 100+ students across 4 cohorts, covering automation applications for real-world use cases.
- Led a Data Analytics and Visualization curriculum for students, covering related tools.
- Mentored 50+ students on IT career paths.

Research and Development Project Manager — Nepal Academy of Science and Technology (NAST)

April 2024 – May 2025

- Secured 1 of 3 national innovation grants awarded nationwide for a fog-harvesting research proposal addressing rural water scarcity, out of 1,000+ applicants.
- Collected and analyzed environmental and social data from 20+ rural sites across 18 districts.
- Authored multiple reports with data visualizations, informing decisions for government agencies and community stakeholders.
- Compiled and maintained structured datasets supporting long-term monitoring across 2 project sites.

Back End Developer — Inspiring Lab

March 2023 – March 2024

- Developed REST APIs and backend systems, integrating 10+ structured databases to support client and internal systems.
- Created 3 AI-powered research tools — a document search engine, resume enhancer, and health data system — used by 1,000+ users.

- Applied computer vision to real-time vehicle tracking and fingerprint recognition systems, achieving 80% recognition accuracy.
- Customized 2 Odoo modules for client-specific knowledge management, cutting process time by 20%.
- Maintained AWS infrastructure (S3, Lambda, CloudWatch) across multiple concurrent projects.

Project Development Manager — Junkiri Industries Pvt. Ltd.

February 2016 – Present

- Coordinate design, manufacturing, and construction of 200+ rural trail, suspended, and suspension bridges across Nepal, connecting engineers, government agencies, and local communities.
- Manage stakeholder relations across 30+ districts, ensuring on-time knowledge transfer for multiple projects and 90% on-schedule delivery.

Web Developer — Nisadhya Marketing Pvt. Ltd.

January 2020 – March 2020

- Built chatbot functionality and 2 WordPress-based websites for an education consultancy over a 2-month engagement.

EDUCATION

MSc. Information Technology (Data Analytics) and Applied Security — London Metropolitan University, London, UK · 2022–2024 · Upper Second Class Honours

BSc. Information Technology (Computing) – Computer Science — London Metropolitan University, London, UK · 2017–2020

PROJECTS

- **Fog Harvester for Rural Nepal** (*Python, NumPy, GeoPandas, Pandas*) — Feasibility analysis identifying 10+ viable fog-harvesting districts in Nepal, developed under NAST innovation grant. github.com/neeraj5508/fog_harvester_feasibility
- **AI-Powered Document Search Engine** (*Generative AI, Back-End*) — Built a generative AI knowledge retrieval system indexing documents for Inspiring Lab. inspiringlab.com.np/khoj-ai
- **Real-Time Vehicle Tracking and Recognition System** (*Computer Vision, Python*) — Deployed a real-time monitoring/ID solution achieving 80% recognition accuracy. youtube.com/watch?v=Wgs_2a5VAv8
- **Sentiment Analysis Web Application** (*Python, Scikit-learn, Streamlit, TF-IDF*) — Real-time text classification app achieving 90% model accuracy. sentimentpredictorgj4fszzuu9c4x9722j5rrd.streamlit.app
- **Health Status of Nepal 2073-74** (*Python, NumPy, Matplotlib*) — Cleaned and analyzed records across hospitals, health programs, and vaccination data for FY 2073-74. github.com/neeraj5508/HealthStatus-Of-Nepal-2073-74-
- **Odoo Hospital Demo Module** (*Python, Odoo*) — Built a custom Odoo module with multiple models and views for hospital management. github.com/neeraj5508/odoo_hospital_demo

TECHNICAL SKILLS

Programming:	Python, SQL, Flutter, Java (Basic), R
Cloud & DevOps:	AWS (S3, Lambda, CloudWatch), CI/CD, Git, Version Control
Development:	REST API Development, Data Modeling, ETL Pipelines, Technical Documentation, Chatbot Development
Data & Analytics:	Pandas, NumPy, Spark, Streamlit, Matplotlib, Seaborn, Data Visualization, Data Cleaning, Statistical Analysis
AI / Machine Learning:	Generative AI, Large Language Model (LLM) Evaluation, Prompt Engineering, RLHF, Agentic AI, Computer Vision, Natural Language Processing (NLP), Data Annotation & Labeling, Model Benchmarking, Quality Assurance (QA)
Project & Stakeholder Management:	Cross-Functional Team Leadership, Stakeholder Engagement, Curriculum Development, Training & Mentorship, Report Writing
Tools & Platforms:	Git, Trello, Google Workspace, Odoo

CERTIFICATIONS

- AWS Educate: Introduction to Generative AI — Amazon Web Services, Aug 2025
- Data Science Methodology — IBM, Feb 2023
- Spark Fundamentals I — BigDataUniversity, Feb 2023
- Python 101 for Data Science — IBM, Feb 2023
- Artificial Intelligence Analyst – Explorer Award 2019 — IBM, Oct 2019
